Summer heat: Reorganization of working hours

As daytime temperatures in the state continue to rise, the working hours of workers working in the sun have been rescheduled until May 10.

The working hours have been fixed at eight hours from 7:00 am to 7:00 pm. All workers working during the day will have a rest period from 12 noon to 3 pm. For workers working on a shift basis, the shifts have been rearranged so that they end at 12:00 pm and begin at 3:00 pm.

Special teams will be formed under the supervision of the District Labour Officer, Deputy Labour Officer and Assistant Labour Officer to conduct daily inspections. Special consideration will be given to the construction and road construction sectors and inspections will be ensured. Areas with a height of more than 3000 feet above sea level

and which are not prone to sun damage have been excluded from the scope of this order.
